Career Objective

Third-year B.Tech Computer Science (Artificial Intelligence & Machine Learning) student at Rajadhani Institute of Engineering and Technology with hands-on experience in Computer Vision, Deep Learning, Python, OpenCV and YOLOv8. Passionate about developing AI solutions for real-world applications, particularly in Computer Vision and intelligent automation. Seeking an AI/ML internship where I can contribute to impactful projects while expanding my practical knowledge.

Education

Rajadhani Institute of Engineering and Technology

Attingal, Kerala

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning)

Duration: 2024 – 2028

Current CGPA: 7.48

Technical Skills

- **Programming Languages:** Python, C
- **Machine Learning:** Machine Learning, Deep Learning, CNN
- **Computer Vision:** YOLOv8, OpenCV, MediaPipe, Image Processing, Camera Calibration
- **Libraries:** TensorFlow, Keras, NumPy, Pandas
- **Tools:** GitHub, Google Colab, VS Code, Roboflow

Projects

AI-Driven Maritime Search and Rescue using YOLOv8

- Developed a UAV-assisted Computer Vision framework for real-time maritime search and rescue using RGB and infrared imagery.
- Trained and evaluated YOLOv8 Nano, Small, and Medium models for accurate human and boat detection in challenging maritime environments.
- Utilized the MOBDrone RGB dataset together with thermal infrared datasets for multimodal object detection.
- Achieved 96.94% mAP@50 95.26% Precision, and 93.28% Recall using the YOLOv8s model.
- Presented the research work at the National Research Conference & Kerala Higher Education Expo 2026.

Hand Gesture Recognition using MediaPipe & OpenCV

- Built a real-time hand gesture recognition system using Python, OpenCV and MediaPipe.
- Recognized multiple hand gestures from webcam input and mapped them to computer actions.
- Designed a modular application with improved gesture detection accuracy and real-time processing.

Image Classification using Convolutional Neural Networks (CNN)

- Developed an image classification model using TensorFlow and Keras.
- Performed dataset preprocessing, model training and evaluation to improve classification accuracy.
- Implemented data preprocessing techniques for improved model generalization.

Research Presentation

- Presented the research poster titled "AI-Driven Maritime Search and Rescue: Real-Time Human and Boat Detection using RGB and Infrared Imagery using YOLOv8" at the National Research Conference & Kerala Higher Education Expo 2026.
